

Part 1: Self-Introduction Script

Good Morning/Afternoon, Sir/Ma'am.

My name is **Faizan Muktar Shaikh**¹. I am from Manmad, Maharashtra.

Currently, I am pursuing my **Bachelor of Engineering in AI & Data Science** at SNJB's Late Sau. K. B. Jain College of Engineering, Chandwad³. I am in my **7th Semester** right now, and I will pass out in **July 2026**.

I have a strong interest in **Artificial Intelligence and Data Science**. To upgrade my skills, I completed a certification course called '**AI Engineer 2025 Bootcamp**' on Udemy.

I have also completed two internships in Data Science and Machine Learning. In my projects, I have worked on **Chest Cancer Classification** and **Human Detection Systems**.

I am a hardworking person and a quick learner. Thank you for giving me this opportunity to introduce myself.

Part 2: Answers to Interview Questions

Q1: What is Zone? Why do you want to join Zones?

Answer:

"Sir, Zones is a Global IT Solutions Provider with over 30 years of experience. The company focuses on four main areas: Workplace Modernization, Network Optimization, Data Center Transformation, and Security.

I want to join Zones because it is a big brand in the IT industry. My background is in **AI and Machine Learning**. I know that modern Data Centers and Security need AI to work better. I want to use my Python and Technical skills to help Zones build smart solutions for clients."

Q2: What do you do in your free time? / Your favourite subject?

Answer:

"In my free time, I like to work on coding projects. For example, recently I was building a Spotify Hit Predictor using data science. Apart from technical things, I also enjoy keeping myself updated with the latest tech news.

My favourite subject is **Machine Learning and Data Science**. I love it because it allows us to solve real-world problems—like how I used Deep Learning to detect chest cancer in my college project. It is amazing how data can predict the future."

Q3: Speak one minute on your hobby.

Answer:

"My hobby is building small electronic and software projects. Since childhood, I have been curious about how things work.

Recently, I started working on a **Sign Language Glove** that can help deaf people communicate. I use sensors and code to translate hand gestures into text. This hobby teaches me patience and problem-solving. When my code fails, I don't give up; I try again. It makes me happy to create something that can actually help people. That is why I love engineering."

Q4: A recent terrorist attack (Delhi Red Fort Blast). Elaborate your opinion.

Answer:

"Sir, I am aware of the tragic Red Fort Car Blast that happened in Delhi on November 10th. It was very unfortunate, and 15 people lost their lives due to the explosion.

My opinion is that violence is never the solution. However, as an engineer, I look at the technical solution. The car used in the attack was parked there for a long time. If we use **AI-powered smart cameras**, we can detect suspicious vehicles automatically and alert the police faster. I believe we must use **Technology and AI** to improve our city's security and prevent such attacks."

Q5: Are you willing to relocate to Bangalore?

Answer:

"Yes, Sir/Ma'am, I am absolutely willing to relocate to Bangalore.

I know that Bangalore is the **IT Hub of India**. For a fresher like me who is passionate about AI and Machine Learning, being in Bangalore is a dream opportunity. I have discussed this with my parents, and they are fully supportive of my career. I am ready to move and start working with Zones."
